

PCB SOLUTIONS

YOUR PARTNER FOR SUCCESS

PCB Solutions

Daleba Electronics Ltd are specialists in the supply of Far East manufactured Printed Circuit Boards. Not only is our service backed up with full UK manufacturing facilities, we have offices in Hong Kong and China to ensure logistical, technical, engineering and quality issues are dealt with effectively and efficiently. All staff in our Far East offices are employed by Daleba. In addition we have a Chinese national based in our UK head office. We believe our structure, communication channels and systems are unrivalled by any other UK manufacturer and this has enabled Daleba to become market leaders in Far East PCB Supply.

Daleba can meet all your needs from pre-production samples through to full production quantities. We will provide a tailor made solution to fulfil your specific requirements.

Importing PCB's since 1992, Daleba has extensive experience in this field. Our competitive pricing and experience together with our customer service and technical support teams has enabled Daleba to grow and maintain a prestigious customer base.

Daleba can offer full UK warehousing, stock holding, next day call off, kan-ban, consignments stocks etc. In addition to these standard procedures, Daleba can tailor more innovative solutions to suit individual requirements and we would welcome the opportunity to work with you to develop a system to improve your PCB supply chain.

Solving the PCB puzzle

Hertford Town Mill
Tamworth Road, Hertford,

Quality and Technical Solutions

Every product manufactured in the Far East follows a vigorous engineering and quality process, originally developed for PCB's manufactured in our UK factory; the system has been tailored and expanded to incorporate Far East PCB supply. This enables customers to benefit from off shore pricing, whilst still being able to take advantage of quality and engineering support.

Daleba recognise the importance of a customer's specific requirements. It is vital that an individual's needs are matched to the correct production facility in the Far East. With Daleba's comprehensive portfolio of manufacturing partners, covering multiple PCB technologies, we can ensure this happens. We give our customers the confidence to choose Daleba as their sole supplier.

Our customers benefit by Daleba having Quality, Technical and Engineering departments in both China and the UK.

Technology and Approvals

Technology

Single Sided, Double Sided
and Multilayer PCB's
Up to 16 Layers

Materials available

FR1, FR2, FR4, CEM-1, CEM-3
Rogers, Nelco, Arlon,
Bergquist, Denka and Thermagon
Hi-Tg FR4
Other materials on request.

Capabilities

Blind via, Buried via, Controlled
impedance, BGA, Micro BGA.
High Copper weights

Approvals available

TS16949, QS9000,
ISO9002, ISO14001

Thermal Solutions

Ever increasing power density demands create constant heat removal problems for designers working in power conversion, power supplies, automotive and avionics.

Metal based PCBs are the principal weapon in the fight to remove heat from electronic components as quickly as possible. Daleba is the leading authority on metal based circuits in Europe. We have made metal based PCB's both our specialisation and our passion. Daleba offer advice and manufacturing solutions to the highest international standards from our dedicated facilities in Hertford and in China, and because we truly are an independent manufacturer we always have a wide range of materials in stock from all major suppliers. This means Daleba can provide the best solution for your application and supply product in the shortest possible time.

LED lighting is a field where we specialise, working closely with device manufacturers, producers of interface materials and assemblers who understand the importance of correct thermal management.

We can help achieve a total solution for all your metal substrate PCB needs. So if you are hot under the collar about a thermal problem, keep cool and contact Daleba.
